PERSONAL SUMMARY

Top-ranked Computer Science graduate (1st/1,637) with hands-on experience in AI systems, LLM integration, cloud architecture, and DevOps engineering. Strong foundation in scalable backend systems, cloud infrastructure, and applied machine learning.

EDUCATION

Bachelor of Computer Science (Honours), *Universiti Tunku Abdul Rahman, Kampar, Malaysia* **Jun 2022 – Jun 2025**

- CGPA:** 3.9813/4.0 (Ranked 1st/1,637) | 3× Best Graduate Award Recipient / Valedictorian
- 11× President's List (Top Academic Distinction, All Semesters) | Full-Tuition Scholar — UTAR Top Achiever Scholarship

PROFESSIONAL EXPERIENCE

AI Specialist (Backend Systems) (Contract-based), *GDEX Berhad Sdn. Bhd., Malaysia* **Feb 2025 – March 2026**

- Reduced manual logistics data **processing time by 90%+** and **improved operational efficiency by 50%+** by architecting and deploying a Dockerised OCR microservice system on **Linux** integrating **LLM-based** image extraction (Gemini / Nova) with automated job pipelines.
- Designed a scalable cloud-based AI architecture on **AWS (ECS / RDS / S3 roadmap)**, enabling robust training, inference and automatic pipelines.
- Enabled scalable batch processing of high-volume waybill images by designing **PostgreSQL job-queue** with worker architecture in Python using SQLAlchemy with transactional locking.

Contract AI Solutions Developer (Project-based), *Real-Analytics Sdn Bhd, Malaysia* **Nov 2025 – March 2026**

- Architected an LLM-driven automated research reporting pipeline integrating structured data ingestion, prompt orchestration, and template-based document generation to produce standardized analytical reports with reduction of manual intervention up to **99%**.

IT Business Analyst/ DevOps Engineer Intern (Full Time), *Hilti Asia IT Services, Malaysia* **Oct 2024 – Jan 2025**

- Delivered 100% production uptime** during CloudSSO system revamp by coordinating cross-functional engineering, security, and business teams across full SDLC lifecycle, translating business requirements into technical specifications, and facilitating UAT testing with structured defect tracking.
- Reduced system latency by 30–50%** by designing and implementing an Apache → Nginx migration POC, configuring reverse proxy architecture and benchmarking under controlled load testing.
- Enabled zero-downtime deployment pipelines** by optimizing GitLab CI/CD workflows using Terraform and AWS infrastructure automation.
- Operated in **Agile/Scrum** environment (Jira, Confluence) within 10-member engineering team.

Research Assistant, *Universiti Tunku Abdul Rahman, Malaysia* **Sep 2024 – Nov 2024**

- Improved structured data extraction accuracy by 38% by designing an LLM integration framework with prompt optimization, output validation logic, and confidence scoring mechanisms.
- Contributed to peer-reviewed IEEE AiDAS 2024 publication by formalizing framework methodology and experimental evaluation pipeline.

Junior Software Developer (Part Time), *Axcell Solutions Sdn. Bhd., Malaysia* **Nov 2023 – Oct 2024**

- Increased user engagement by **55%** by developing and optimizing responsive promotional websites using **WordPress**.
- Improved front-end component reusability by 43%** by refactoring static HTML implementations into modular Vue.js architecture.

Assistant Software Engineer (Part Time), *Ringo Technologies Sdn. Bhd., Malaysia* **Jan 2022 – May 2024**

- Reduced project planning time by 15%** by producing structured system flow documentation and formalized requirement analysis artifacts.
- Improved sprint execution clarity by collaborating within a 2-engineer Scrum team to define deliverables, backlog scope, and release checkpoints.

AWARD-WINNING PROJECTS

Large Language Model Application Integration for Extracting Unstructured Data **May 2024 – Jun 2025**

- Independently developed a novel framework to integrate **LLMs** into data processing pipelines for extracting structured information from unstructured data.
- The system developed using **PyQT, Python and LLMs** achieved a **96.93%** overall accuracy, **89.46%** reduction in processing time, and a **38.43%** decrease in operational costs, enhancing efficiency and reliability for industries like logistics.
- Won **UTAR Final Year Project Competition 2025 - *Champion*** (Top one project among ~200 entries across all IT faculties)

Human Connection Application **Feb 2024 – Jul 2024**

- Designed and developed an AR-based application using **ViroReact, React Native, and TypeScript** to enhance human communication by recognizing and transcribing real-time emotional context, integrated with multilingual translation and AI-powered text summarization using **LLMs**.
- Finalist and won **Best Poster Award** in Tech4Good Challenge by ViTrox 2024 (~300 participants from Malaysian universities).

AR Travel Application **Jun 2023 – Jul 2023**

- Designed a travel assistant app using **Flutter, TypeScript and Dart** that lets users explore historical landmarks through NFC-triggered content, 3D object interactions using **ARCore**, and AI-powered chats.
- Awarded **1st Runner-Up** at **UTAR x USM Hackattack 2024** (~180 participants nationwide)

PUBLICATIONS AND CERTIFICATIONS

- J. E. Ho, B. Y. Ooi and M. Westner, "Application Integration Framework for Large Language Models," 2024 5th International Conference on Artificial Intelligence and Data Sciences (AiDAS), Bangkok, Thailand, 2024, pp. 1-6, doi: 10.1109/AiDAS63860.2024.10730541.
- Alibaba Cloud Certified Associate (Credential ID IACA01240900151798L) **Issued Sep 2024**
- AWS Academy Graduate - AWS Academy Cloud Foundations **Issued Aug 2024**

SKILLS AND EXPERTISE (View Skills and Related Projects)

- Programming Language:** Python | JavaScript | TypeScript | Dart | Java | SQL | C++ | HTML | CSS
- Framework and Libraries:** Node.js | Next.js | Express.js | REST APIs | Bootstrap | jQuery | Vue.js | Flutter | React Native | React | PyQt
- Databases:** MySQL | PostgreSQL | Firebase | MongoDB | SQLite | Microsoft Access
- Cloud, Infrastructure and DevOps:** AWS | Alibaba Cloud | Huawei Cloud | Terraform | Datadog | Git | CI/CD | Docker | Nginx | Apache HTTP | Linux
- AI / ML:** Large Languages Model (LLM – Gemini, Qwen, Claude, GPT, Nova) | TensorFlow | OpenCV | PyTorch
