## PERSONAL SUMMARY

Top-ranked Computer Science graduate (1st/1,637) with hands-on experience in AI systems, LLM integration, cloud architecture, and DevOps engineering. Strong foundation in scalable backend systems, cloud infrastructure, and applied machine learning. Available for **Singapore relocation**. Contactable via **WhatsApp or Email**.

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                              |
