PERSONAL SUMMARY

Top-ranked Computer Science graduate (1st/1,637) with hands-on experience in AI systems, LLM integration, cloud architecture, and DevOps engineering. Strong foundation in scalable backend systems, cloud infrastructure, and applied machine learning. Available for **Singapore relocation**. Contactable via **WhatsApp or Email**.

PROFESSIONAL EXPERIENCE

AI Specialist (Contract-based), GDEX Berhad Sdn. Bhd., Malaysia **Feb 2025 – March 2026**

- Architected and deployed **AI-powered Optical Character Recognition (OCR) system** and **Parcel Delivery Verification system** using fine-tuned **LLM Models (Gemini and Nova AI)** in **Python** and **PyTorch**.
- Automated manual logistic data extraction workflows, significantly boosted efficiency by over 50% and improved data processing speed by over **90%**.
- Designed a scalable cloud-based AI architecture on **AWS**, enabling robust training, inference and automatic pipelines.
- Implemented structured JSON output validation and fallback model logic for production reliability.

IT Business Analyst/ DevOps Engineer Intern (Full Time), Hilti Asia IT Services, Malaysia **Oct 2024 – Jan 2025**

- Coordinated end-to-end delivery of CloudSSO revamp across cross-functional teams, ensuring successful production release with **100%** uptime.
- Gathered and translated business requirements into technical specifications, facilitated UAT testing and issue tracking.
- Designed and implemented Proof of Concept (POC) for Apache → Nginx migration of Hilti Cloud WebGate, configured **Nginx** reverse proxy, benchmarked performance under controlled load testing, demonstrating **30–50%** latency reduction while provided architectural recommendations and risk analysis.
- Optimized GitLab CI/CD pipelines using Terraform & AWS for zero-downtime deployment.
- Operated in **Agile/Scrum** environment (Jira, Confluence) within 10-member engineering team.

Research Assistant, Universiti Tunku Abdul Rahman, Malaysia **Sep 2024 – Nov 2024**

- Designed LLM integration framework for structured data extraction, improving pipeline accuracy by 38% through prompt optimization and validation logic.
- Contributed to research leading to IEEE AiDAS 2024 publication

Junior Software Developer (Part Time), Axcell Solutions Sdn. Bhd., Malaysia **Nov 2023 – Oct 2024**

- Increased user engagement by **55%** by developing and optimizing responsive promotional websites using **WordPress**.
- Integrated designed HTML websites with functional **Vue.js**, improving 43% reusability of components and better state management.

Assistant Software Engineer (Part Time), Ringo Technologies Sdn. Bhd., Malaysia **Jan 2022 – May 2024**

- Produced system flow documentation and requirements analysis, reducing project planning time by 15%.
- Collaborated with a team of 2 engineers, applying Scrum framework for project management.

EDUCATION

Bachelor of Computer Science (Honours), Universiti Tunku Abdul Rahman, Kampar, Malaysia **Jun 2022 – Jun 2025**

- CGPA:** 3.9813/4.0 (Ranked 1st/1,637) | 3× Best Graduate Award Recipient / Valedictorian
- 11× President's List (Top Academic Distinction, All Semesters) | Full-Tuition Scholar — UTAR Top Achiever Scholarship

AWARD-WINNING PROJECTS

Large Language Model Application Integration for Extracting Unstructured Data **May 2024 – Jun 2025**

- Independently developed a novel framework to integrate **LLMs** into data processing pipelines for extracting structured information from unstructured data.
- The system developed using **PyQT, Python and LLMs** achieved a **96.93%** overall accuracy, **89.46%** reduction in processing time, and a **38.43%** decrease in operational costs, enhancing efficiency and reliability for industries like logistics.
- Won **UTAR Final Year Project Competition 2025 - Champion** (Top one project among ~200 entries across all IT faculties)

Portable Intruder Detector System (A Score Project) **Aug 2024 – Sep 2024**

- Achieved **98.7%** detection accuracy and sub-**2.3s** alerts using machine learning and image processing techniques with **OpenCV**, face recognition with DeepFace, MongoDB, SQLite, and Telegram API to detect human and animal intruders.

AR Human Connection Application **Feb 2024 – Jul 2024**

- Designed and developed an AR-based application using **ViroReact, React Native**, and **TypeScript** to enhance human communication by recognizing and transcribing real-time emotional context, integrated with multilingual translation and AI-powered text summarization using **LLMs**.
- Finalist and won **Best Poster Award** in Tech4Good Challenge by ViTrox 2024 (~300 participants from Malaysian universities).

AR Travel Application **Jun 2023 – Jul 2023**

- Designed a travel assistant app using **Flutter, TypeScript** and **Dart** that lets users explore historical landmarks through NFC-triggered content, 3D object interactions using **ARCore**, and AI-powered chats.
- Awarded **1st Runner-Up** at **UTAR x USM Hackattack 2024** (~180 participants nationwide)

PUBLICATIONS AND CERTIFICATIONS

- J. E. Ho, B. Y. Ooi and M. Westner, "Application Integration Framework for Large Language Models," *2024 5th International Conference on Artificial Intelligence and Data Sciences (AiDAS)*, Bangkok, Thailand, 2024, pp. 1-6, doi: 10.1109/AiDAS63860.2024.10730541.
- Alibaba Cloud Certified Associate (Credential ID IACA01240900151798L) **Issued Sep 2024**
- AWS Academy Graduate - AWS Academy Cloud Foundations **Issued Aug 2024**

SKILLS AND EXPERTISE (View Skills and Related Projects)

- Programming Language:** Python | JavaScript | TypeScript | Dart | Java | SQL | C++ | HTML | CSS | HCL
- Framework and Libraries:** Node.js | Express.js | REST APIs | Bootstrap | jQuery | Angular | Vue.js | Flutter | React Native | React | PyQt
- Databases:** Firebase | MongoDB | SQLite | MySQL | PostgreSQL | Microsoft Access
- Cloud and DevOps:** AWS | Alibaba Cloud | Huawei Cloud | Terraform | Datadog | Git | CI/CD | Docker | Nginx | Apache HTTP
- AI / ML:** Large Languages Model (LLM – Gemini, Qwen, Claude, GPT, Nova) | TensorFlow | OpenCV | PyTorch
